

6516205643.txt

Hello I find it disturbing that the terrestrial radio stations are attacking XM radio. XM provides services that local radio does not. If I'm traveling, I find it very useful to know what the weather is like at home before I get there. I can plan better. Please do not follow the NAB broadcasters recommendations. They are trying to stifle competition. There are now large conglomerate broadcast companys such as Clear Channel which will do anything to prevent any competition.

cheers
